

TOPJOB® S Miniature Rail-Mount Terminal Blocks

Unbeatable Space Savings

Miniature Rail-Mount Terminal Blocks

Ideal for Installation in Cramped Terminal Boxes

With lengths of 33 mm (nominal cross-section: 1 mm²) and 36.5 mm (nominal cross-section: 2.5 mm²), WAGO's miniature rail-mount terminal blocks are very compact, making connection particularly convenient in the cramped terminal boxes of motors or pumps, for example.

2.5 mm² miniature rail-mount terminal blocks are 25% shorter than standard TOPJOB® S rail-mount terminal blocks (e.g., Item Number 2252-1201).

Mounting Versions

On DIN-rail (15 x 5.5 mm)

- With operating slot or push-button
- Ground (direct) contact

On Mounting Plate via Flange

- With operating slot or push-button
- Mounting via M4 screw

On Mounting Plate via Snap-in Foot

- With operating slot or push-button
- Mounting plate width: 0.6 mm (min.) / 1.2 mm (max.)

Actuation Types with Push-in CAGE CLAMP®

Select from two actuation types:

Terminal blocks with push-buttons or operating slots

Advantages of push-buttons:

- Use any standard operating tool.
- The orange color highlights the actuator, giving users a clear overview at a glance.

Advantages of operating slots:

- The tool stays in the operating slot – both hands are free for wiring.
- After insertion, the operating tool marks the clamping point and keeps it open.

Miniature Rail-Mount Terminal Blocks

Application Examples

WAGO's TOPJOB® S Miniature Rail-Mount Terminal Blocks with operating slots or push-buttons feature a compact design, making them ideal for connections in the cramped terminal boxes of motors or pumps, for example.

Miniature Rail-Mount Terminal Blocks in Use

Device Connection in Building Technology – Outdoor Unit of an Air-Conditioning System

So small, yet so large – the generous marking surface of the TOPJOB® S Miniature Rail-Mount Terminal Blocks enables a quick overview in compact subsystems.

www.wago.com/miniature-terminal-blocks-air-conditioning-system

Device Connection in Control Cabinets

A smaller size means a better fit – TOPJOB® S Miniature Rail-Mount Terminal Blocks offer a compact design for device connection in control cabinets.

www.wago.com/miniature-terminal-blocks-control-cabinet

Electric Motor Wiring with Miniature Rail-Mount Terminal Blocks

- Delta connection wiring with pre-assembled delta jumper (e.g., Item Number 2000-0405/011-000)
- Connection type identifiable by multi-line marking strips (e.g., Item Number 2009-110)

Advantages of motor wiring with WAGO's miniature rail-mount terminal blocks compared to the motor terminal board:

- Convenient wiring without conductor preparation
- Save wiring time via plug-in connection technology
- Touch-proof protection
- Maintenance-free

Product Overview

Configure compact terminal block assemblies easily and quickly.

The new free miniature terminal block configurator makes it quick and easy to find the right application solution from our wide range of miniature terminal blocks. This configurator makes it possible to customize terminal block assemblies – in the familiar Smart Designer online configurator environment.

A Comprehensive Range of Accessories

The WAGO Miniature Rail-Mount Terminal Block is the smallest version in the TOPJOB® S portfolio. And because they're part of the family, all of the industry-trusted TOPJOB® S accessories are also compatible with the miniature rail-mount terminal blocks.

	2050/2250 Series		2052/2252 Series	
	Description	Item Number	Description	Item Number
	Push-in type jumper bar, insulated, light gray (other colors available)

	11 mm wide			2009-110
	Miniature DIN-rail, 15 x 5.5 mm			
	Steel, slotted, 2 m long			210-111
	Steel, unslotted, 2 m long			210-295
	Aluminum, unslotted, 2 m long			210-296
	Screwless end stop, for miniature DIN-15 rail			
	6 mm wide			249-101
	Mounting foot, for DIN-35 rail, snaps onto terminal blocks with snap-in mounting foot; 6.4 mm wide			
	gray			209-120

Push-in CAGE CLAMP®
Push-in termination of solid and ferruled conductors

Pre-Configured Push-In Type Jumper Bar as Star and Delta Jumper

Multi-Line Marking
Convenient, continuous marking strip (Item No. 2009-110) for both terminal block and jumper identification

Mounting Adapter
Mounting foot for DIN-35 rail (Item No. 209-120) for terminal blocks with snap-in mounting feet

Testing
Built-in test points simplify testing with 2 mm Ø test plug (Item No. 210-136)

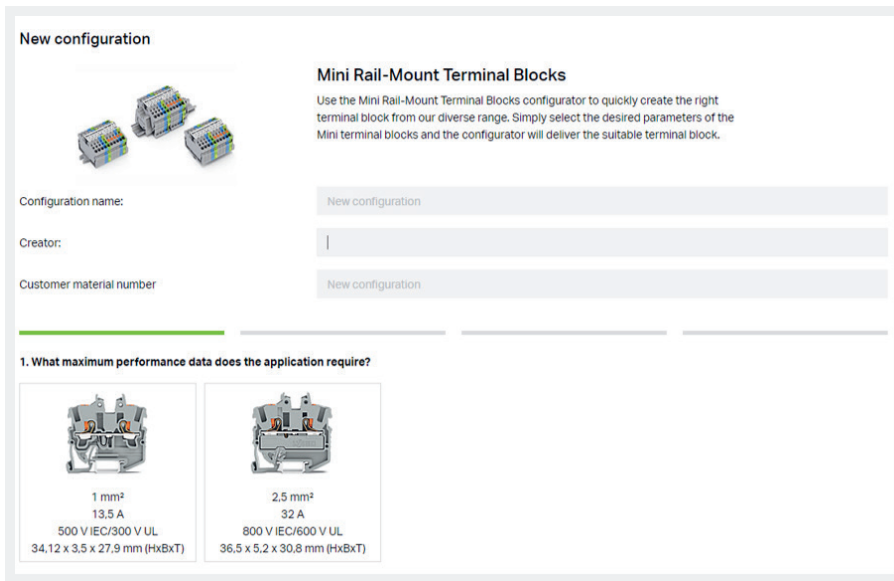

Miniature Rail-Mount Terminal Block Configurator

Configure compact terminal block assemblies easily and quickly.

The new free miniature rail-mount terminal block configurator simplifies finding the right application solution from our broad portfolio. This configurator makes it possible to customize terminal block assemblies in the familiar WAGO Smart Designer Configurator.

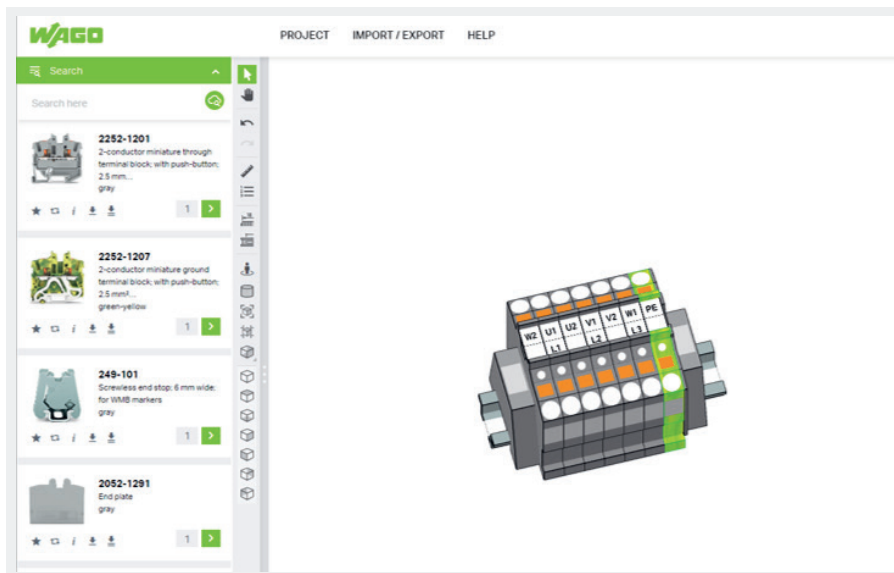

Create a new configuration in the miniature rail-mount terminal block configurator. configurator.wago.com/profile/login

An application-oriented query creates a terminal block based on user inputs.

This requires parameters such as rated data, mounting type, actuation type, number of terminal blocks and desired color variants to be defined according to the application.

Display and extend your configuration in Smart Designer, if required.

The assembled terminal blocks are configured in 3D in Smart Designer. Here, more terminal blocks, accessories and customized labeling can be added. It is also possible to generate a parts list, CAD and CAE data or to request a quote.

Easy, Straightforward, Reliable: How to Find Your Digital Twin!

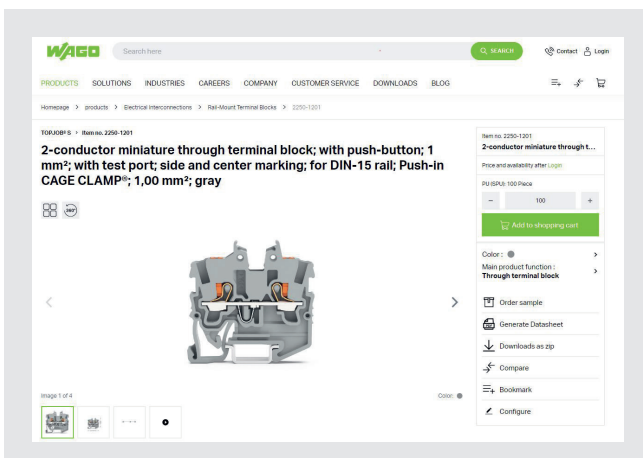

Digital Twin

- A detailed, accurate visual representation of an object, including all its different forms of information
- Wiring can be represented with all wire paths, cable ducts and DIN-rails, as well as all drilled holes and cut-outs
- Many activities are simplified and individual positions within a building system are easier to identify thanks to a 3D visualization
- As a result, manufacturing is faster and the error rate drops significantly
- Save time and money
- Status data can be exchanged between the real and digital twin during ongoing operation

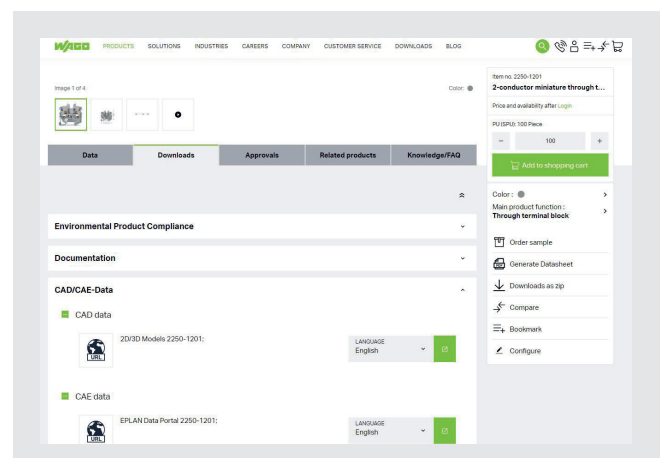

Practical Example

A WAGO partner uses AutoCAD to set up its project in 3D. By doing so, it is also simulating its digital twin. Therefore, our partner needs digital twins of WAGO's miniature terminal blocks to simulate the installation space and to position the drilled holes for the mounting plate's flange.

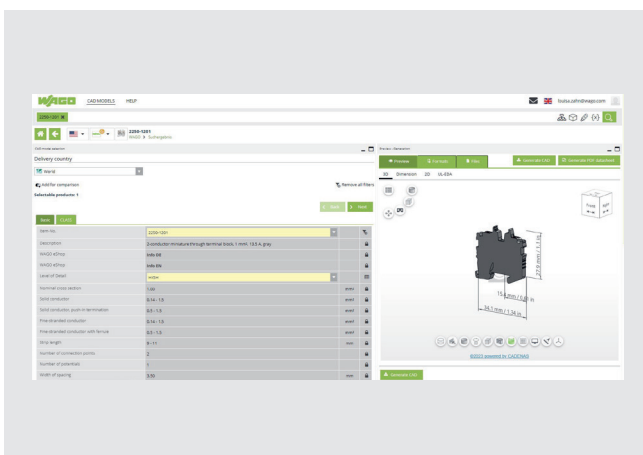

Only a few steps are needed to obtain a digital twin from WAGO:

1 Search for the necessary item at www.wago.de.

2 When you find the item, go to "Downloads/CAD/CAE data."

3 In the WAGO Part Community, you can select the proper CAD twin from among more than 60 different formats.

Digital twins, in addition to 3D models, also require electrical functional descriptions. Depending on the engineering software, they are located in the **EPLAN Data Portal**, the **Zuken Component Cloud** or the **WSCAD Universe** for download.
